

Test Cases and Test Report

We tested each feature by hand (using the API and the browser) as we built it. Below are the main test cases and their results.

#	Test case	Steps	Expected	Result
1	Register customer	Submit register form	Account created as "pending"	Pass
2	Login before approval	Login as pending user	Sent to "waiting for approval" page	Pass
3	Wrong password	Login with bad password	Error "Invalid email or password"	Pass
4	Admin approve	Approve a pending user	User can now log in	Pass
5	Suspend member	Suspend an active user	User blocked, sees suspended page	Pass
6	Add category	Admin creates a category	Appears in list	Pass
7	Delete used category	Delete a category in use	Friendly error, not deleted	Pass
8	Pay 3 months	Pay monthly x3	Expiry = today + 3 months	Pass
9	Renew	Pay again	Expiry extended from current expiry	Pass
10	Membership status	View dashboard	Shows Active / Expiring Soon / Expired correctly	Pass
11	Referral bonus	Referred member pays	Referrer earns bonus + 100 points	Pass
12	Reward points	Register + pay	Points added correctly (with multiplier)	Pass
13	Withdraw below minimum	Withdraw under category limit	Rejected with message	Pass
14	Withdraw valid	Withdraw allowed amount	Points deducted, recorded	Pass
15	Facility access	Book a not-included facility	Rejected (403)	Pass
16	Book allowed facility	Book an included facility	Booked, +10 points	Pass
17	Reports	Open reports as admin	Correct totals shown	Pass
18	Non-admin blocked	Open admin API as member	403 Forbidden	Pass

#	Test case	Steps	Expected	Result
19	Notifications	Approve / pay	Notifications appear	Pass

Summary

All main test cases passed. Testing was manual (curl + browser). Automated tests were not added because of time, but could be added later with a tool like Jest.
